

USER MANUAL

GROWTH SCREENING WHEEL

When the age and weight (for a weight-for-age wheel) or age and height (for a height-for-age wheel) is known then the screen can be applied as follows:

STEP 1: Turn the Rotator knob until the pointer points to the age in months of the child

STEP 2: Check the appropriate Gender window and find where the known weight or height as the case may be is classified: Severe (SD3neg), Moderate (SD2neg - SD1neg) and Mean (SD0) for that age.
